

Resolution # 2018-07

A Resolution creating the Façade Improvement Program Review Committee

Whereas, the Griffith Redevelopment Commission (RDC) has approved and implemented a Façade Improvement Program;

And, all applications for the program are initially approved or denied by the full RDC during its monthly public meeting;

And, final payment for reimbursement to any applicant must always be approved by the full RDC;

And, there may be occasions when the RDC approves an application to proceed with the intended work contingent on several items being completed that may include: acceptable cost estimates, design, color schemes and other requirements of the RDC.

Therefore, in order to expedite the application process, the RDC now forms a Façade Review Committee consisting of two members of the RDC appointed by the RDC Chairman and empowers this committee with the authority to give approval for a project to proceed with the intended work for a Façade Improvement Program application that has been conditionally approved by the RDC at a prior meeting.

Agreed and effective upon passage on this date March 27, 2018.
