

Resolution No 2025-3
A Resolution for the Griffith Façade/Sign Improvement Program

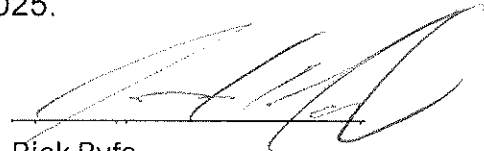

Whereas; Griffith's Commercial Facade Improvement Program has been developed by the Griffith Redevelopment Commission to promote the continual enhancement and maintenance of commercial buildings in Griffith Business Districts. Small businesses are a great source of new employment and help attract customers from the community and surrounding areas

And this program is designed as an assistance reimbursement program to offer financial support and encourage tax paying business owners to redevelop and improve their commercial buildings to entice consumers. Each applicant could be eligible to receive a reimbursement grant to assist in the redevelopment of the exterior of the commercial building. Grants will be determined by the Commission based upon the completeness and detail of the application and other factors detailed in this packet. The funds available for this program are limited. Applications will be considered on a first-come-first-serve basis

Therefore, the Griffith Redevelopment Commission hereby approves 2025 year funding that will be a matching reimbursement on a 50/50 basis up to the total cost of \$10,000 for signage and \$15000 for facade improvements, resulting in a maximum possible reimbursement payout by the Redevelopment Commission of \$5000 for signage and \$7500 for other facade improvements per business for the duration of the program starting on April 1, 2025.
